DevOps Transformation - Solution Brief:

Transform Your Team Into
DevOps Practitioners

In order to ensure a successful digital transformation for your organization, enhance your IT team with DevOps practices and tooling.

Common challenges:

- Buy-in from business stakeholders
- Technical teams risk being led by technology instead of business value
- Teams lacking experience and looking for the right tools and practices
- Technical team stuck re-inventing the wheel(s) trying to get it right
- Lack of qualified, motivated talent

CloudOps can help!

DevOps is the combination of cultural philosophies, practices, and tools that increases an organization's ability to deliver applications and services at high velocity: release products at a faster pace than organizations using traditional software development and infrastructure management.

CloudOps offers training that will transform your members of your development and infrastructure teams to help meet business goals more efficiently. **Via the following workshops:**

	Infrastructure As Code	Microservices, Docker and Kubernetes	Secrets Management	DevOps Monitoring	Continuous Integration and Delivery
Security and Security and Governance					
Application Developers	½ day	3 days	½ day	1 day	1 day
Platform Operators	1 day	4 days	1 day	2 days	2 days
Platform Architects	2 days	6 days	2 days	3 days	4 days

Additional workshops:

Cloud IaaS concepts: VPC/FW/security groups, testing (platform and app), Istio
